

The Dashboard

The [Project List](#) can also be used to access your projects

The Dashboard is composed of three panes

External Links

This panel provides quick access to useful external links. If you think we have missed a critical link, please [contact us](#).

Read the latest news from system administrators

BioData Projects

In the project pane, you can:

- **Navigate** to and **Edit** your projects
- **View** other projects
- Navigate to a tabular list of projects using the "**Go to Project List**" button at the top of the panel
- Request a new project using the '**Request a New Project**' button
- **Filter** by selecting either '**My Projects**' or '**All Projects**'
- **Sort** the project list by **Project Name**, **Project Label**, or **Science Center**

If no projects appear in the BioData Projects panel, you are probably not a member of the project staff of any projects in BioData.

- For project access, contact a member of the project staff of the project or the BioData team ([contact us](#)).
- To request a new project, [contact us](#) or click on the 'Request a New Project' button in the application
